They underwent a preliminary examination in Materis Medica, Anatomy, Surgery, Ac., by a Board composed of the leading medical practitioners in the Colony, and received very satisfactory certificates, which, inscribed on parchment, were publicly presented to them by your Excellency in this hall. Our senior pupil teacher, Mr. Lo Kit, was a candiate for the Government Scholarship, which was not awarded this year, as neither candidate continuer the discussion on the "Pictorial re- obtained the necessary number of marks. joyed by the unsuccessful candidates, for their number, if this valuable scholarship were properly contested, must naturally exceed that of the few distinguished successful scholars. Through the exertions of Mr. Bateman, Head Shui. Master of the Hougkong Public School, Hongkong has been made a centre for the Cambridge Local Examinations. The first examination was held in December, and though the results cannot be known here before May, and I have no reason to be sanguine of their nature, I can already see the benefit of the extra study on our hix candidates, five of whom ontered for the unior and the other for the senior examination. It is also worthy of note, as a sign of the interest taken by Chinese parents in their sons' education, that in no case was any demar made about paying the seven dollars entrance fee. This year I have instituted a Boys' self-supporting Lending Library. Money was advanced to procure books from England. A varied se. Nowrojoe. lection of books for boys, movels, works of Class VI, 1, Chan Chin On, inkstand, by Mr. D. travel, history, and biography, was made; a committee of the six senior boys was D. Nuwrojes. formed to control the Library, which was opened about the middle of October. The anbscription was put at ten cents a month, and we have had an average of no less than 74 boys, mostly Chinese, subscribers monthly. We may expect great results in English composition, and in the acquirement of good colleguist English when our boys find pleasure in reading English

standard authors, and in making acquaintance with the customs and conversation of every day English life as represented in our leading novels. Six pupil teachers have been articled for a period of three years, having deposited a security of one hundred dollars each, to provide the six additional Chinese assistants that will be required in the New School. It was with BEFORE THE HON. SIE GEORGE PRILLIPPO considerable joy that all masters, boys, and friends of the school read the statement made by your Excellency at the opening of the Legislative Connell that the New School would be opened early in 1888. Two-thirds of the walls are already raised, and it is most earnestly to be desired that no stone be left unturned to admit of the new building being occupied after Chinese New Year at the old of February; or early in March, next year. By this means the change would take place at the time of our annual promotions and a better chance would be afforded

ant consideration of a complete year's study in Fuilty. the new subjects would be secured. HIS DECELLENCY-Mr. Wright, ladies and gentlemen. I have listened with great interest and pleasure, as I have no doubt all of you have: done, to the report just read by Mr. Wright, Head Muster of this school. As usual this report has been of a highly satisfactory character. In fact, under the able management of Mr. Wright and his assistants, I should have been much surprised if it had not been a satisfactory one. I am and a it will be a matter of gratification to all the take an interest in this school to see the progress that has been made in the erection of the new Victoria College close by here, to which place the echolars are to be transferred as soon as it is completed. (Applause). It is believed that this new college will be completed about Mr. Gladstone has written a letter supporting; March or April next year. I hope it will be finished in time to transfer all the boys there by. the end of the next Chinese New Year holidays. as Mr. Wright has expressed the hope they will be. Still, after a building has been completed there are always a great number of internal fittings and arrangements to be made, and I cannot feel entirely confident that it will be ready at that time. About one thing, however, I do feel confident, and that is that this is the last time the public distribution of prizes will take place in this inconvenient and crowded room, for it will-

in time for the next distribution of prizes. (Loud appleuse). There will be ample accommedation in the new Victoria College for about 170 more boys than it has been possible to take, even with crowding, in this place. That necessitates, of course, an increase in the staff of masters. have received, two days ago, from Mr. Wright a very able and carefully drawn report showing made. I have hardly had time to consider this report yet, but it will have the careful consideration of the Government and the necessary arrangments will be made before the new building is opened. ment with regard to the Government Scholarship. On a recent occasion, at the distribution stated that, after consulting Dr. Stewart, the Acting Colonial Secretary, who still takes the greatest interest in all matters connected with education, that as the two competitors for this scholarship had failed last year to attain the necessary number of marks to win the Scholarship and it was consequently not given, the next Scholarship would be offered to competition this

year instead of in 1888, the date for which it was originally fixed. I thought it was hardly worth while for the Government to make the this was the principle upon which I made that announcement. I have since been informed, however, by the directors and managers of public institutions likely to compete for this fair to those who have commenced their studies for the next scholarship, which was to have been vice. competed for in 1888, if I were to have the therefore, withdraw the announcement I then made, and the next examination will take place in 1888, at the time originally fixed. I will now proceed to the distribution of prizes The school

> A minister, who was inclined to be absent minded, while walking one day, encountered al young lady whose face somehow seemed to be familiar to him. Taking her to be one of his parishioner's daughters, and not wishing to pass her without notice, he stepped forward, and, cordially shaking her hand, entered into conversation, expecting that her name would immediately come to his recollection. After comparing notes about the weather, however, and other topics, he had at last to confess, "Well, I know your face quite well, but I cannot recall day; he comes and asks for a day's work. ENGLISH AND CHINESE DICTIONARY. WITH THE PUNTI AND MANDARIN PRONUNCIATION.

An Anglo-Chinese Dictionary, published at the Daily Press Office, Hongkong. For comprehensiveness and practical service this Work stands unrivalled. All the new allce. words which the Chinese have of late years been compelled to coin to express the numerous objects in machinery, photography, telegraphy. of foreign relations has imposed upon them, are here given in extenso. Each and every word is fully illustrated and explained, forming exercises for students of a most instructive nature. Both the Court and Punti pronunciations are given the seconts being carefully marked on the best principle hitherto attained. The typography displays the success of an attempt to make the Chinese and English type correspond in the size of body, thereby effecting a vast economy of space, achieving a clearness not previously attained, and dispensing with those vast margins and vacant spaces which have heretofore charactorized Chinese publications.

To the illustrate the vast scope of the work following facts are submitted for consideration:-Chalmers' Vocabulary contains about 16,000 Chinese characters, and Medhurst's English and Chinese Dictionary about 100,000, whilst this work contains more than 50,000 English words, and upwards of 600,000 Chinese characters. Again, despite all the grammars and other elementary works as yet published, the student of 'his difficult language absolutely requires examples to display the various applications and equivalents of different words which have one general meaning. Of these examples this work contains more than five times as many as any other Dictionary bithorto pub-

For practical purposes the arrangement of the work is so complete, that a reference to its pages embles a person who understands English to communicate effectively with natives who understand nothing but Chinese. In this respect Europeans residing in China, and to the natives themselves it explains subjects fully with which very few indeed of them are perfectly acquainted. o parties resident in England and interested in China it cannot but be invalgable occasion-
